

STAMPANTI OLIVETTI OLIVETTI PRINTERS

IL PUNTO DI RIFERIMENTO/ THE POINT OF REFERENCE

olivetti

p u n t o d i f o r z a s t r o n g p o i n t

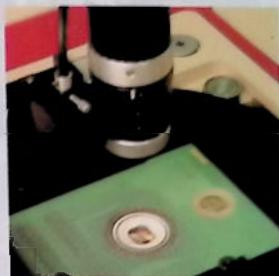

E' l'esperienza di ottant'anni di scrittura il vero punto di forza delle stampanti Olivetti.

Dai complessi percorsi meccanici delle prime "stampanti manuali" alle moderne tecnologie pilotate da impulsi elettronici, la scrittura Olivetti ha segnato in maniera indelebile la civiltà del Novecento.

The experience gained from producing writing tools for the past 80 years is the real strong point of Olivetti printers. From the complex mechanical parts of the first "manual printers" to modern sophisticated technology, Olivetti printing has left an indelible mark on Twentieth Century civilization.

L'innovazione è il punto di partenza nello sviluppo delle stampanti Olivetti. Quell'innovazione che guarda al futuro e punta lontano. Quella che richiede capitali e intelligenza. E quella che richiede molto tempo: un tassello di storia Olivetti, per portarsi tra i primi tre nel mondo.

The starting point in developing Olivetti printers is innovation. Innovation which looks to the future and opens new frontiers. Which demands financial and intellectual investments - and time. A significant part of our history - and one which puts us among the top three producers in the world.

Per le stampanti Olivetti, la qualità totale è il punto fermo. Qualità evidente a colpo d'occhio, ma presente dovunque nel processo. In un viaggio a ritroso nel prodotto - produzione, progettazione, ricerche di mercato - troviamo sempre quella stessa idea: concepire la macchina per l'Uomo.

Quality is the fixed point in all Olivetti printers. Quality you can see at first sight, and which is present throughout the manufacturing process. Analysing the products - production, design, market research - we come back again and again to the same principle: machines conceived for Man.

O, meglio, "tecnologia"

Le stampanti a matrice di punti sono le più versatili e quindi ancor oggi le più diffuse. Loro caratteristiche: gestione economica, lavoro anche con moduli multi-copia; possibilità di stampare a colori. Impieghi: elaborazione dati, word processing. Carichi medio-alti.

Dot matrix printers are the most versatile and therefore still the most widely-used printers today. They feature economic use, multi-copy operation, colour printing. Used for data processing, word processing, forms. Suitable for medium to high workloads.

Dot-Matrix

logie". Averle è il punto chiave. Olivetti le domina da tempo e le usa per dare a ogni esigenza la
Or, rather, "technologies". The key point is to have them.
Olivetti is a past master in them all: enabling us to provide the best solution for every need.

Le stampanti a getto d'inchiostro offrono qualità paragonabile a quelle delle laser al prezzo delle dot matrix. Loro caratteristiche: silenziosità, affidabilità, grande gamma di carattere, impiego: word processing, grafica, gestionale, corrispondenza. Carichi medio-bassi.

Bubble Ink-Jet printers offer laser-like quality at dot matrix prices. They feature: low noise, reliability, high legibility. Used for: word processing, business graphics, correspondence. Suitable for low to medium workloads.

Bubble Ink-Jet

SELECTING FONTS

Control Panel Fonts can be selected for printing using either the control panel or using printer commands. The control panel allows you to select your default font. The default font you select will be used unless you select a different font using printer commands.

Pitch If you do not select a default font using the control panel, the printer will use its factory default font. This font is a portrait, Nordic «x.10 point, upright, italic, bold font. (These font characteristics are explained later in this chapter, beginning on page 4-21.)

Cartridges Some font cartridges contain a default font. When the font cartridge is installed, its default font will be in use unless it is overridden by either the control panel or a printer command.

The priority of fonts selected is:

Priority

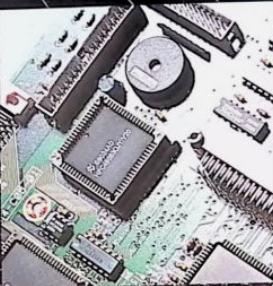

Table 4-B. Font Selection Priority

First:	A font selected using a printer command (or your software.)
Second:	A default font selected using the control panel's Printing Menu.
Third:	A default font contained in an installed font cartridge.
Fourth:	The factory default font (resident in the printer).

Details

Note: The printer command selected font will override the default font and the priority is reset using the RESET key or by selecting the 3 SEQUENTIAL command using your software.

migliore risposta.

Le stampanti laser sono gioielli tecnologici, il top della qualità e delle prestazioni. Loro caratteristiche: silenziosità, velocità, costi contenuti. Stampate su ogni tipo di carta, con i colori vivi e le texture.

Laser printers are technological jewels, giving the highest quality performance. They feature high speed, ability

dal vostro punto di vista from your point of view

Molti sono i punti di vista di chi usa le stampanti; e quindi, molti sono i modelli offerti da Olivetti Office. Ognuno progettato sulla vostra attività. Tutti modelli personalizzabili e flessibili, tra cui certamente troverete la "vostra" soluzione.

Printer users are many, all with a different point of view. That is why there are many models in the Olivetti Office range of printers. Each designed for a particular type of activity, flexible and easy to personalize. No doubt "your" solution is amongst them
